

CLEAN LABEL CONFERENCE

May 23-24, 2023
Itasca, Illinois, USA

Sophisticated Solutions for Simplified Products

2023 Technology Snapshot Presentation Submission Form

The Clean Label Conference Technology Snapshot (TSS) presentations are always a big hit with our R&D attendees. Many sessions are standing room only. The sessions provide product developers with critical updates on new, commercially available, clean label ingredients and the opportunity to implement specific solutions to formulation challenges. To see past TSS presentations, go to <https://cleanlabel.globalfoodforums.com/clean-label-events/clean-label-library/> and scroll down.

The 2023 Clean Label Conference will offer a total of 24 15-minute Technology Snapshot presentations on Tuesday, May 23rd and Wednesday, May 24th, 2023.

Due to the limited number of presentation slots and to best serve our attendees, submissions rated highest by the Advisory Board will be invited to the event.

If accepted for a presentation slot, the 15-minute presentation would typically include:

1. The ingredient's distinguishing technical properties, benefit(s) and application(s).
2. Regulatory considerations including GRAS status.
3. Its brand name and how the ingredient would appear on labels.
4. Companies can submit up to two TSS submission forms. Submitting a Technology Snapshot is Free. However, if a submission is accepted, a Technology Snapshot Speaker registration fee of \$795.00 is required to help cover out-of-pocket costs. Only one such reduced fee is given per accepted submission. An accepted presenter has access to all presentations, meals, networking events, exhibits and materials made available to the general attendees. For questions, contact Jenny Bogdajewicz-Stricker, Conference Manager, Global Food Forums, Inc., at Jenny@GlobalFoodForums.com or 1-847-226-2181

Judging Criteria

- Newness
- Uniqueness in Marketplace
- Focused Information
- Detail of Functional/Technical Benefit
- Ingredient Legend Impact
- Program Contribution
- Impact on Food Industry
- All required fields filled in (required indicated by a )

For more information, see
<https://bit.ly/3rlwLnG>

The submission deadline is December 12, 2022. If accepted, all winning applicants will be notified by January 16, 2023.

*If insufficient space, feel free to expand the space if submitting in Word.
If using the PDF form, please indicate if additional information is included/attached.*

•• Date of submission: _____.

•• Product brand name (to be listed on the program) _____.

•• How can the ingredient be listed on the ingredient statement of packaged food & beverages?
_____.

•• Year introduced into the marketplace or marketed for a distinctly new use: _____.

•• What are the benefits of your ingredients? For example, functional/physiochemical properties, label claims, lower cost, ingredient(s) replaced, and so on.) Please note that all members of the evaluation panel have science degrees. It is helpful to provide technical details since this is usually the key evaluation criteria of panelists.

Why is your ingredient unique? That is, describe how this product is different from other ingredients in the market used for the same purpose.

Application(s) for your technology (e.g., processed meats, baked goods, beverages, yogurt):

Regulatory considerations (including GRAS status if it is an ingredient):

INFORMATION USED BY GLOBAL FOOD FORUMS TO DRAW R&D ATTENDEES TO A PRESENTATION:

35 words (maximum) description of the ingredient/benefits to entice R&D attendees to your session. This will be published.

Please put the name of your Company and Ingredient in the Subject line. Application submitted by*

Company: _____ Name: _____
